

Meet Midget.

Midget is a 15 year old, femal spayed kitty who was brought into Pismo Beach Veterinary Clinic with her housemate for euthanasia. Her original owner had recently died and the new caretaker did not want either of them and had decided to put them both to sleep. She is an inquisitive and friendly cat who needs a loving home.

Midget is current on her vaccines, has been tested negative for feline leukemia and aids, and has recently had a dental cleaning and complete blood panel performed. Though she is a senior kitty, she is in very good health.

If you would like to visit her, please let us know! There will be a nominal adoption fee that will go towards our H.E.L.P. fund that assists owner's in limited income situations.
