

## 9-Year Old Australian Shepherd, Female, Red Merle

We are searching for a loving and safe new home for our family pet, Luna. Luna is a very sweet, playful, and energetic Australian Shepherd. Although we love her dearly, we have not been able to provide her with the attention that she needs to live her happiest life. Like most Australian Shepherds, Luna is full of energy and very smart. She loves running, hiking, mountain bike rides, and frisbee. Luna has never shown signs of aggression, and other than being rambunctious is good with children and other dogs. She has spent lots of time around toddlers. We are unsure of how she would do with cats, but she does not tend to chase after prey animals. She does great when boarded at the kennel and enjoys playing with the other dogs.

Luna has a few behavioral issues that her future family should be aware of: 1) When greeting unfamiliar people or friends and family that she has not seen recently, she stands up and puts her paws on them; 2) She has escaped from our yard on several occasions despite our best efforts to secure the backyard; 3) She gets nervous (paces and whines) when we pack for a trip, or get ready to go on a hike or run and she thinks we may leave her at home; and 4) She and the neighbor dog bark at each other through the fence when in their backyards.

Luna weighs approximately 40 pounds. She has not had any significant health issues. She is spayed; has updated vaccinations; is on flea, tick, and heartworm prevention medication; has a microchip; and is licensed in San Luis Obispo County.

We are seeking a home for Luna that will provide her a loving, caring, and safe environment. She would love a family that has plenty of time to give her the attention she deserves. We think she would be her happiest on a large property with room for her to roam.

Rehoming Fee - To be discussed. Contact Information: Kyle Anderson
